

About This Activity

Ready, Set, Go! interval speed test will challenge students to develop speed and accuracy in their interval identification skills. With the clock ticking, students should identify 10 intervals as fast as they can. Assign a *U* to unison intervals, an *O* to octaves, and a numeric value (2nd, 3rd, etc.) to all other intervals. When the student completes the line, record their time (incorrect answers add 5 seconds to their score). Challenge them to beat their score. Beg: 60 sec/10 intervals - Int: 40 sec/10 intervals - Adv: 20 sec/10 intervals.
